Tutor pricing and pay at FrancoLink

How much students pay for a lesson, how much the tutor gets, and how tutors earn more. Internal reference · October 2026 · all amounts in US dollars

The short version

- There are two kinds of tutor: **Community** (cheaper) and **Professional**.
- A standard lesson is **50 minutes**. Students pay **$10** for Community or **$25** for Professional.
- A tutor is paid a **fixed amount per lesson**: **$6.50** for a new Community tutor, **$13.00** for a new Professional tutor.
- Tutors who teach more lessons and keep good ratings move up a **pay ladder**, to at most $8.00 (Community) or $14.50 (Professional).
- On top of that, tutors can earn a **bonus** and **referral commission** for bringing in their own students.

1. Where the money from one lesson goes

For a new tutor teaching a regular 50-minute lesson at full price:

Community lesson: student pays $10.00

Professional lesson: student pays $25.00

Goes to the tutor Kept by FrancoLink (the “take rate”)

The plan is to lower FrancoLink’s share on Professional lessons to about 35% once there are more than 20 tutors.

2. What students pay

	Community	Professional
One 50-minute lesson	**$10.00**	**$25.00**
One 25-minute lesson (always half price)	$5.00	$12.50
Starter pack: 3 lessons, no subscription	$29	$59
Which tutors the student can book	Community only	Community and Professional

Discounts

Discount	How it works
Longer plans	Monthly plan: full price. 3-month plan: 10% off. 12-month plan: 20% off. On a yearly plan, a Professional lesson costs the student $20.
First month	New subscribers get their first month cheaper: 30% off Community, 40% off Professional.
Free first lesson	Students who sign up for 2 or more lessons a week get one free 25-minute first lesson. Starter packs don't include it.

Important: discounts come out of FrancoLink's share, never the tutor's. The tutor gets the same pay however much the student paid, and is paid for the free first lesson too. The database won't let a discount bring a lesson's price below what the tutor gets paid for it.

3. What tutors are paid

Every tutor starts at step 0 of their tier. They move up a step once they meet **all** the conditions in that row. Amounts are per 50-minute lesson; a 25-minute lesson pays half.

Tier and step	Needed to reach it	Per lesson	≈ Per hour
Community, step 0	**Starting point**	**$6.50**	**$7.80**
Community, step 1	50 lessons taught, 95% reliability	$7.00	$8.40
Community, step 2	150 lessons, 95% reliability, rating 4.5+	$7.50	$9.00
Community, step 3	300 lessons, 95% reliability, rating 4.5+	$8.00	$9.60
Professional, step 0	**Starting point**	**$13.00**	**$15.60**
Professional, step 1	100 lessons, 95% reliability, rating 4.5+	$13.75	$16.50
Professional, step 2 (highest)	300 lessons, 95% reliability, rating 4.6+	$14.50	$17.40

"Per hour" is the per-lesson pay scaled from 50 to 60 minutes, for comparing with other platforms. $14.50 is a hard maximum: any reward above that comes from the bonus pool (section 4), not base pay.

Moving from Community to Professional

A Community tutor is promoted to Professional (and starts at $13.00 a lesson) once they reach: **200 lessons**, **97% reliability**, **50% rebooking**, and an average rating of **4.6 or higher** from at least **15 ratings**.

When a pay change applies

Pay is fixed when a lesson is **booked**. A raise only affects lessons booked after it, and lessons already on the calendar keep the rate they were booked at.

4. Extra earnings

Bonus pool

Students sometimes pay for lessons they never use. Every pay period, **half of that unused money** goes into a bonus pool shared among tutors. A tutor's share grows with the number of lessons they taught and how often their students rebook with them.

Referral commission: for bringing in your own students

Every tutor has a personal invite link. When a student who signed up through it pays:

What the student buys	What the tutor earns
A self-study subscription (the app, no live lessons)	**10%** of the first month, then **5%** of every month after, for as long as the student stays subscribed
A live-lesson plan	A one-time bonus: **$10** for a Community plan, **$20** for a Professional plan

This money builds up in the tutor's dashboard. The tutor requests a withdrawal and FrancoLink pays it out. If the student gets a refund, the commission on that payment is taken back.

5. Examples

A new Community tutor teaching 15 lessons a week
15 × $6.50 = **$97.50 a week**, about **$422 a month**.
After 300 lessons with good ratings (step 3), the same week pays 15 × $8.00 = **$120**.

A new Professional tutor teaching 20 lessons a week
20 × $13.00 = **$260 a week**, about **$1,126 a month**.
At the top step: 20 × $14.50 = **$290 a week**, plus any bonus pool share.

The same lesson at different student prices
A Professional lesson on a 12-month plan costs the student $20 instead of $25, but the new tutor still earns **$13.00**. FrancoLink's share drops from $12.00 to $7.00.

A tutor invites a student who buys a Professional lesson plan
The tutor gets a one-time **$20** referral bonus, plus normal pay for every lesson they teach that student.

6. Terms used in this document

Tier
Community or Professional. Sets the student price and the pay range.

Step
A level within a tier's pay ladder. Higher step, higher pay per lesson.

Reliability
The share of booked lessons the tutor actually showed up for and didn't cancel. 95% means fewer than 1 in 20 missed or cancelled by the tutor.

Rebooking
How often a tutor's students book more lessons with them. A sign students like the tutor.

Take rate
The share of the student's payment that FrancoLink keeps after paying the tutor.

Unused lessons ("breakage")
Lessons a student paid for in their plan but let expire without booking. Half of this money funds the bonus pool.

> **Where these numbers come from:** the default values in FrancoLink's code and database setup files. Admins can change prices and commission rates in the admin panel, so check */admin/pricing* for the live figures before quoting them to anyone.
